

Handouts and other materials that will be available at the workshop and well in advance

- One-pager expedition summaries
- Community survey report
- Answers to open-ended survey report questions

Prior to the meeting:

- Steering Committee (SC) leaders assign Expedition watchdogs (August)
- SC leaders reach out to co-chiefs to find out if they are available/willing to review expedition “success” data
- Watchdogs fill out Expedition Success Template (September 8)

Day 1

Morning: Overview, 8:30-9:30 AM

A. Introduction to JR renewal needs and process; survey results

- I. Welcome and logistics (USSSP)
- II. Meeting Organization (Workshop Co-Chairs): introduction of steering committee and section leaders
- III. Reason we are here, with emphasis on Sea Change document (NSF)

B. Directions/ charge

- I. Charge (Workshop Co-Chairs)
 - a. Review of the IODP Science Plan and the JR’s contributions to date in addressing its themes and challenges. *What was the role of the facility (ship/ops/EPSP/JRFB) in these outcomes?*
 - b. Translate the community’s statements about the JR facility from survey results; highlights of concerns in data, if any; identify cross-cutting ideas/ threads (e.g., scientific goals for JR in remaining 5 years; unique ability of the JR and its crew to push the technology; addressing Sea Change recommendations to reduce budget)
- II. IODP proposals mapped to themes and challenges (IODP Forum Chair)
- III. JR enhancements/modifications – what is realistic (JRSO)
- IV. Questions (Workshop Co-Chairs)

C. Breakout Sessions 9:30 - 10:30:

Task #1: Review Expedition Success in each theme (watchdog presentations); Results shared in advance (co-chiefs, EPM, TAMU, SC)- no later than Sept 8; 5 minutes of comment (emphasize why it did succeed when possible)

Expedition Success Template: Did the expedition accomplish its objectives?

list each objective in one column

Yes/no to expedition objectives

Why yes? Why no?

Coffee Break 10:30 - 11:00

D. Breakout Sessions 10:30 - 12:00

- I. Revisit comments on Expedition Success
- II. Translate the community's statements about the JR facility using survey results and highlights of concerns in data
- III. Explore how these concerns compare with knowledge gleaned from Expedition Success reports

Lunch 12:00 - 12:45

Afternoon

E. Breakout Sessions 1:00 - 3:00: Continue Morning's work

- I. Revisit comments on Expedition Success
- II. Translate the community's statements about the JR facility using survey results and highlights of concerns in data
- III. Explore how these concerns compare with knowledge gleaned from Expedition Success reports
- IV. Review community survey to provide guidance to JR facility regarding goals/objectives for each Science Plan theme that should be emphasized in remaining 5 years

Coffee Break 3:00 - 3:30

F. Breakout Sessions continued 3:30 5:30

- I. Fill out template answering the four questions for each challenge

Western Pacific Warm Pool Documentary Preview 5:30 – 6:00

Day 2

G. Breakout Sessions continued 8:30 - 10:00

- I. Revisit template; finalize for plenary presentation

Coffee Break 10:00 - 10:30

H. Plenary Presentation: Task 2 by theme/ possibly by challenge

- I. Review: has each challenge been addressed? (Yes/ no/why?) Is it a facility issue or a science issue (e.g., proposal pressure not there, wrong ocean, etc.)?

Lunch 12:30 - 1:30

I. Plenary discussion

- I. Given Tasks 1&2, what are the specific merits of the JR facility and how will it continue to help accomplish the goals of the Science Plan? (threads/ similar issues?)
- II. Outline possible enhancements/modifications to the JR facility, if needed.
- III. Scientific outcomes of regional operations: how has it worked to stay in one place? yes/ no/ some supporting statements (sea change)
- IV. Are there other shifts such as regional operations in our standard operating procedures that could lead to innovations / economies of resources like this? (as recommended directly by the sea change)
- V. Provide community guidance to JRFB on science to be targeted along future ship track

Finish 6:00
